

Colorful Jumbo Koi Kit

This is a Koi. In real life, it is a member of the *Carp* family. The idea for making a sculpture of a Koi came from my wife, who was doing a needlepoint picture of a group of Koi swimming in a pond. It looked so interesting on the needlepoint that I thought it would be an interesting sculpture.

The Jumbo Koi Kit consists of our exclusive urethane *Bodiform*, exclusive self-adhesive Template Sheets, Pattern Sheets, illustrated Instruction Manual, our *Secrets of Stained Glass Sculpture* booklet, and a pair of Glass Eyes for added realism. The Jumbo Koi is nineteen inches long and is made out of 251 piece of glass. It is relatively simple to make; the *Comparative Time Rating* is only 6.2. Not only will you be delighted with the finished project, but you will be even more delighted with the comments from friends and relatives when they see it displayed in your home.

As with all of our Kits, there is a 100% Satisfaction Guarantee that comes with the Kit. After you open the carton and read the instructions, if you think that you are unable to make it, just pack it up in the same carton and return it to us. We will refund the price of the Kit.

Three-dimensional stained glass sculpture, "as pretty as a picture."
